

This map illustrates the distribution of the Eastern Screech Owl across the Eastern United States. The data is represented by purple circles, where the size of the circle corresponds to the number of owl sightings at that specific location. The circles are numbered, with some locations showing counts as high as 63. The map covers a large area, including the Atlantic seaboard, the Appalachian region, and the Southeast. Major cities like New York, Washington, D.C., and Atlanta are marked. A grid of latitude and longitude lines is present, and a legend in the bottom left corner provides additional context for the symbols used.
